

Papilio Temporary Tattoo Paper/Kit

This kit can NOT be used in inkjet printers.

Printing and Application Instructions

Do not use the tattoo tack or a tattoo made in this way if you are pregnant or nursing a baby.

- 1) Use your favorite paint or draw program, your clip art collection, and your imagination to design your tattoo art.
- 2) Print A MIRROR IMAGE onto the PTT on the shiny side of the paper using an office copier, laser printer or dye sublimation printer. (For Alps MD4000: select specially coated paper and multi pass black. Other media selections may work as well) If there is no text in the tattoo, there is no need to print mirror image. The tattoo will be a mirror image of the original image. You can easily fit 20 to 30 tattoos per page more or less depending on the size of each tattoo. Test print out on regular paper, and then print out the on the entire PTT page.

PTT

PTT8511/GK/ 10 sheets 8.5" X 11"

If this paper is a part of the Tattoo Kit the kit consist of:

5 sheets PTT paper (8.5" x 11")
5 sheets of pressure sensitive tattoo tack. Medical/skin approved.

Before you open this package read instructions and disclaimer.

Tattoo Transfer Adhesive

This adhesive comes in sheet form (sheet adhesive) and has two (2) release liners.

Instructions:

- 1) Peel one liner off and press the adhesive sheet firmly onto the tattoo (tattoo paper) after printing.
- 2) Remove the other clear liner before pressing the tattoo onto the skin.
- 3) Soak the paper with warm water. Wait about 20-30 seconds and then slide the paper away. If paper does not move freely then wait a little bit longer.

Some individuals can develop allergic reactions even when using medical grade glue.

ALPS

USE THE STANDARD RIBBONS FOR THIS PAPER/ FILM.

Note:

- Do not attempt to copy or print on sheets of PTT paper you have already cut holes in or cut pieces off. This can cause a paper jam and may possibly damage your equipment.
- For best paper economy arrange images that fit on the whole sheet, print on regular paper to test and then print on the whole surface of the PAS paper the first time.

- This paper has not been tested in, nor is it recommended for use in high speed industrial type copiers/printers.
- Even though this paper has been tested on most late model office copiers and laser printers the user must determine the compatability of this paper with his own equipment.**
- In some cases, if the paper jams and stays in contact with the hot fusing roll (in a copier or laser printer) damage can occur. In case of paper jam,

Disclaimer: Do not use the liquid tattoo tack or a tattoo made in this way if you are pregnant or nursing a baby because of chemicals in the tack and possible migration of chemicals from the copiers or printer ink into your body. Use Glue in well ventilated area. MSDS available from HPS. Before making tattoos in large quantity or for resale, become familiar with the chemical composition of the copiers or printer ink you intend to use. Some individuals can develop skin allergic reactions even when using medical grade glue. You must assume all responsibility for the safe use of the glue and this paper. If you do not accept full responsibility for the use of this product, return the un-opened package to HPS for full refund. Terms of sale are as listed on the invoice.
